

Salmo updates classic lures

Salmo have launched brand new versions of its well known Salmo Perch for 2008. The Perch 12 Super Deep Runner and Perch 14 Super Deep Runner are, as the name suggests, designed for deep trolling and will reach nine metres and eleven metres deep respectively when trolled about 30 metres behind the boat on 0.23mm braided line without any additional weight.

The smaller version, the Perch 8SDR, also remains a really good seller in the Salmo portfolio, which now includes more than 1,000 different models.

The Salmo Perch SDR is available in seven patterns: Perch, Hot Perch, Grey Silver, Green Tiger, Real Roach, Luminescent Red Head and Silver Blue Orange. Enquiries to ewaryst@salmo.com.pl
